DIRECTIONS FOR USE

Use with Auto-Chlor System automatic dispensing equipment, to feed product directly from container to dishwashing machine. Follow proper container change over procedures when replacing empty product with full product. Consult your Auto-Chlor Service Professional for additional information and materials.

FULL PRODUCT DESCRIPTION

Auto-Chlor System Machine Detergent 4x is an institutional grade, highly alkaline concentrate developed for industrial and institutional use. It is specifically formulated for fast and efficient cleansing of heavily soiled dishes, flatware, and utensils in adverse water conditions. This non-abrasive liquid quickly breaks down stubborn food soils, grease, and oils. Because of its capabilities for outstanding saponification, emulsification, and water hardness control, Machine Detergent 4x easily handles excessive grease loads and inordinately stained dishware. Achieves optimum results when used with Auto-Chlor System equipment, rinse agents, and sanitizers.
