FULL PRODUCT DESCRIPTION

Auto Kleen MS is a chlorinated, non-caustic powdered detergent designed for use in industrial and institutional machine warewashing operations. This alkaline detergent was developed for the quick and efficient cleansing of soiled dishes, flatware, and utensils and is safe to use on soft metals such as silver, silver-plate, pewter, and aluminum. Auto Kleen MS will remove all types of stubborn food soils, grease, and oil and the activated chlorine prevents the staining of dinnerware. Highly active detergent beads are automatically dispensed with Auto-Chlor accurate dispensing systems.
