Specifications

Standard 90 second cycle, 38 racks/hr

- A
 - Electrical - 115 VAC, 60 Hz, 1 PH
 - 20A Dedicated Circuit
- B
 - Water Consumption 1.04 gal/rack (38.4 GPH)
 - Water Supply Flow Rate 7.5 GPM Minimum
 - Water Temp 120°F Minimum
 - Water Supply Connection ½" NPT female
 - Backflow Protection ASSE 1001 Vacuum Breaker
- C
 - Drain Connection: 2" NPT
 - 20" above floor
- C*
 - Optional Scrap Accumulator
 - Connection 2" NPT
 - Centerline 15½" above floor
- D
 - Wash Cavity Clearance 27" Max Height
- E
 - Rack Clearance-20⅛" between tracks
 - Rack Size: 20"x 20"
- F
 - Table Height at Machine Entrance 34"

Available Options:

- Auto-Start
- Leg Extensions 3"
- Vapor Removal System (VRX)
- 72 second cycle, 47 Racks/hr, 51 GPH
- 60 second cycle, 55 Racks/hr, 60 GPH

Optional Supplemental Water Heaters Available

An optional integrated water heating system is available for this model dishmachine. The integrated system mounts within the framework of the machine so no additional floor space is required. The integrated heater is ideal for facilities with insufficient water capacity, on-demand style water heaters or remotely located heaters. The heater can operate on 50A 208-240V circuits using either single or three phase power. Contact your local Auto-Chlor System representative for more information.
